Kirisun Digital iTalk PTT Radios:

The iTalk Radio System Two Way Radios have been launched in South Africa and plug a gap in the market for cost effective nationwide radio communications.

- They are simple to operate, small and robust.
- You have a choice of Portable or Mobile/Base devices

System Operation:

The radios operate on MTN or Vodacom networks using the cell phone data network to provide communications.

To put it simply, wherever you have cellphone coverage you will have radio coverage.

iTalk 200 Portable

iTalk 220 Portable

iTalk 450 Mobile/Base

Features:

- GSM
- Wifi
- Unique iTalk PTT Software
- Voice Recording
- Reports
- Group Call
- Individual Call

M.H.COMMUNICATIONS

- GPS
- Nationwide Coverage
- Emergency/Panic Button
- Landline and/or cell phone calling to individual radios.

Server Software Access: (Optional)

Access to the server is via any Computer or Laptop to track your radios as well as communicate (talk) to them from these devices.

The Computers only require a speaker, a microphone and access to the internet.
(Laptops are generally supplied standard with speakers and microphones).
